PROFILE

AI & ML Engineer with hands-on experience developing NLP pipelines, machine learning models, and RESTful AI applications during industry internship training. Skilled in Python, TensorFlow, scikit-learn, spaCy, BERT, FastAPI, and AWS, with strong interests in Generative AI, LLMs, and Agentic AI systems. Passionate about building scalable, data-driven AI solutions and seeking entry-level AI/ML Engineering opportunities in Bengaluru.

EDUCATION

AMC Engineering College

B.E. – Artificial Intelligence & Machine Learning | CGPA: 7.7 / 10.0 | Bengaluru, India

Aug 2022 – Jun 2026

EXPERIENCE

AI & ML Engineering Intern

Rooman Technologies Ltd | Bengaluru, India

Jan 2025 – May 2025

- ◆ Built a Resume Screening & Ranking System using spaCy, TF-IDF, BERT and ML-based scoring models; deployed APIs with FastAPI and hybrid cosine + BM25 ranking.
- ◆ Implemented KNN, SVM and Random Forest classifiers with GridSearchCV tuning, improving model F1-score by ~17%.
- ◆ Developed NLP-based ticket classification and sentiment analysis workflows; gained hands-on experience with AWS SageMaker, Linux and prompt engineering.

PROJECTS

AI/ML Resume Parser & Ranking System

Python · spaCy · BERT · FastAPI · XGBoost

- ◆ NLP pipeline for resume parsing, semantic matching and ML-based candidate ranking.
- ◆ Hybrid cosine + BM25 scoring with FastAPI/CLI support and 80%+ pytest coverage.

Intrusion Analytics System · Team Lead

Python · TensorFlow · scikit-learn

- ◆ Real-time intrusion detection for cyberattack classification via ML anomaly detection.
- ◆ Led model evaluation, system design and end-to-end project delivery.

AI ProjectForge – Idea Generator

Python · LLM · Prompt Engineering

- ◆ Prompt-driven LLM system generating structured AI/ML project ideas from user inputs.
- ◆ Improved consistency with few-shot prompting and iterative prompt refinement.

AI-Powered Crop Yield Prediction · Team Lead

Python · scikit-learn · pandas

- ◆ ML model for crop yield prediction and recommendation using agricultural datasets.
- ◆ Led a 4-member team to deliver a data-driven decision-support tool.

TECHNICAL SKILLS

LANGUAGES

Python C++

MACHINE / DEEP LEARNING

KNN SVM Random Forest XGBoost

Gradient Boosting TensorFlow PyTorch

NLP

spaCy NLTK BERT Sentence-Transformers

TF-IDF Sentiment Analysis

GENAI & LLMs

Prompt Engineering Agentic AI LangChain Claude API

TOOLS

FastAPI pandas NumPy pytest Git
